

Sunday, October 18
1310-1440

Moderated ePosters 18
Kidney & Ureteral Cancer

MP-18.01

Molecular Epidemiology of Aristolochic Acid-Induced Upper Urinary Tract Urothelial Carcinoma in Japan
Junichi Inokuchi, Japan

MP-18.02

Preoperative Predictive Factors of Endoscopic Management in Patients with Upper Tract Urothelial Cancer
Tae Heon Kim, South Korea

MP-18.03

Association of Polymorphisms in Aurora Kinase A (STK15) Phe31Ile and Survivin rs1042489C>T Genes with Susceptibility to Upper Urinary Tract Urothelial Carcinoma in Taiwan
Jiun-Siang Tan, Taiwan

MP-18.04

Metastatic Renal Cell Carcinoma in Sweden 2005-2013
Sven Lundstam, Sweden

MP-18.05

Immediate Changes in Reassigning Tumour Stage According to TNM 2009 in a Contemporary Cohort of RCC Tumours
M. Pilar Laguna Pes, The Netherlands

MP-18.06

Prediction of Renal Mass Aggressiveness Using Clinical and Radiographic Features: A Global, Multicenter Prospective Study
M. Pilar Laguna Pes, The Netherlands

MP-18.07

Could Surgery Be Prevented in the Management of Small Renal Masses?
Andre Joshi, Australia

MP-18.08

Small Renal Masses in Young Adults
Akbar Ashrafi, Australia

MP-18.09

Robotic Multiplex Partial Nephrectomy: Comparison of Perioperative Outcomes Stratified by Body Mass Index
Adam Metwalli, USA

MP-18.10

Knotless Retroperitoneoscopic Nephron Sparing Surgery for Small Renal Masses: A Comparison of Sutureless and Self-Retaining Suture Techniques

Jianfei Ye, China

MP-18.11

Cyberknife for Renal Cell Carcinoma: 5-year Follow-up after Treatment

Aleksandr Iatsyna, Ukraine

MP-18.12

Robot-Assisted Laparoscopic Partial Nephrectomy with Alf-X Robot on Pig Model

Giorgio Bozzini, Italy

MP-18.13

Preoperative Chronic Kidney Disease (CKD) Status is an Independent Prognostic Factor in Patients with Renal Cell Carcinoma

Yong-June Kim, South Korea

MP-18.14

Prognostic Value of Molecular-Targeted Therapy in Renal Cell Carcinoma Patients with Bone Metastasis: A Multi-Institutional Retrospective Study in Japan

Atsushi Takahashi, Japan

MP-18.15

Evaluation of Symptoms and Quality of Life in Patients with Ureteric Stents for Malignant Obstruction

Tariro Gandiya, UK
