

Building the Future of International Urology

education / research / publications / networking / philanthropy

For Healthcare Professionals only.

Helping him focus on the moments that matter

DUODART* (dutasteride/tamsulosin) and **AVODART*** (dutasteride) have long been used by HCPs across the globe to help **men with moderate to severe LUTS due to BPH†** be present for those big moments.*¹⁻⁶

The UK trade name for dutasteride/tamsulosin is **Combodart**.

DUODART and AVODART are supported by landmark trials of 5-ARIs in 11,868 patients, including 6909 patients who received dutasteride as monotherapy and in combination with tamsulosin.^{§7-12}

Both dutasteride-containing treatments are available in a **90s pack** for long-term treatment as recommended by guidelines.^{||1,2,13}

DUODART
(dutasteride/tamsulosin HCl) Capsules

Used by HCPs
for over a decade.³
Registered in 85
countries worldwide.⁴

Avodart
dutasteride

Used by HCPs for
over two decades.⁵
Registered in 95
countries worldwide.⁶

**Consider DUODART or AVODART[®] as a first choice
for your patients with moderate to severe BPH^{1,2,7-12}**

Dear Friends,

E pluribus unum
"Out of many, one"

My journey with the SIU has taken me on many different adventures over the years: from participating as an invited speaker and attending SIU Congresses around the world, to becoming a member and learning about the many offerings of the Society, to finally joining the Board of Directors and developing new and enriching initiatives and activities. Over this time, I have witnessed the extraordinary accomplishments that can come from many working as one.

It is my honour to now serve as President of the Society and shepherd the SIU into a new era that will certainly bring further growth and greater success. The active participation of every member is integral to the advancement of our mission. Together, we build on the strong foundation laid by those before us and continue to foster collaboration, innovation, and education that will shape the future of urology worldwide.

In a world where it is easy to focus only on what is at your front door, I invite you to take a step onto the international stage and join this vibrant and dedicated community to work as one in advancing urological care for patients all around the world.

SIU MEMBERSHIP

MAKE YOUR MARK ON GLOBAL UROLOGY

Join the SIU today and see how your membership:

LEVELS THE PLAYING FIELD

Dues **subsidize membership fees and Congress registrations and fund scholarship programmes** for urologists from middle- and low-income countries.

STEERS THE FUTURE OF THE SIU

Members are encouraged to **nominate new Board members**.

MAKES EDUCATION ACCESSIBLE

There is no charge to **publish in or to read SIUJ**, and **SIU Academy** is a user-friendly eLearning platform with a **rich library of free content**.

ADVANCES RESEARCH

Institutions are still being enrolled in the latest **uCARE registry**.

BUILDS COMMUNITY

Valuable **connections** are made amongst members. Spread the word and invite colleagues to join.

In recognition of their contributions to the Society, members enjoy

- Access to SIU Academy and SIUJ
- Reduced Congress fees
- Global networking opportunities
- Educational events, online and in-person

Residents and trainees are eligible for free membership.

PSMA PET Imaging and Radioligand Therapy in Prostate Cancer

What Urologists Need to Know in 2025

SS-02 • Thursday, October 30, 2025 • 1245-1400 GMT

Sidlaw Auditorium, L3, EICC

Discover the Role of PSMA PET Imaging and Radioligand Therapy in Advanced Prostate Cancer Management

Learning Objectives

At the end of this symposium, participants should be able to:

- Recall the fundamentals of PSMA imaging and radioligand therapy in the contemporary management of prostate cancer.
- Summarize the basics of PSMA PET/CT imaging acquisition, interpretation, and clinical indications as well as its role in guiding treatment decision-making in prostate cancer management.
- Outline the current PSMA-targeted radioligand therapies and supporting clinical evidence in the management of eligible patients with mCRPC.
- Recognize the role of a multidisciplinary tumour board in guiding the management of patients with advanced prostate cancer in clinical practice.

Novartis products will be discussed and prescribing information will be available at the meeting. For UK HCPs, please scan the QR codes to access the respective prescribing information.

Pluvicto▼ [lutetium (177Lu) vipivotide tetraxetan] is indicated for the treatment of adult patients with prostate-specific membrane antigen (PSMA)-positive metastatic castration-resistant prostate cancer (mCRPC) who have been treated with androgen receptor (AR) pathway inhibition and taxane-based chemotherapy or who are not medically suitable for taxanes.

Locametz▼ (gozetotide), after radiolabelling with gallium-68, is a radioactive diagnostic agent indicated for the identification of prostate-specific membrane antigen (PSMA)-positive lesions by positron emission tomography (PET) in adult patients with prostate cancer.

Adverse events should be reported. Reporting forms and information can be found at www.mhra.gov.uk/yellowcard. Adverse events should also be reported to Novartis online through the pharmacovigilance intake (PVI) tool at www.novartis.com/report or alternatively email medinfo.uk@novartis.com or call 01276 698370.

GU CANCERS TRIAD MEETING
7th B2B Uro-Oncology:
GU Cancers Triad Meeting

SURGERY DAY Programme

October 30, 2025 **0730–1705 GMT** **Pentland, L3, EICC**

Surgery Day will be livestreamed on the *SIU@U* app, included with your Congress in-person and virtual registration.

About Surgery Day

This dynamic, all day session will highlight essential urological procedures in endourology of upper and lower urinary tract, uro-oncology and focal therapy, and reconstruction. Led by internationally renowned experts, the programme will feature real-time transmissions of live surgeries from prominent centres, alongside engaging semi-live presentations. Join us for insights into innovative technologies, advanced instrumentation, and cutting-edge techniques.

Surgery Day Co-Chairs

Stavros Gravas
Cyprus

Rajeev Kumar
India

Jean de la Rosette
Türkiye

Learning Objectives:

At the end of this session, attendees should be able to:

- Update knowledge of recent developments in equipment and technique for the minimally invasive and surgical management of urologic diseases, based on live and pre-recorded surgical demonstrations.
- Acknowledge the role of open, laparoscopic, and robotic-assisted surgical procedures in uro-oncology and reconstructive urology, with respect to new systems, instrumentation, and techniques.
- Summarize practical knowledge of instrumentation and techniques for the endourologic treatment of upper and lower urinary tract conditions.
- Recognize the role of focal therapy approaches in uro-oncology.
- Recall perioperative considerations for optimizing urologic surgery outcomes, based on treatment guidelines and expert opinion.

Watch this session live to claim **CME credits**.

**BENCH OF
BEDSIDE**
URO-ONCOLOGY
GU CANCERS TRIAD

In conjunction with
SIU
Around the
WORLD
EDINBURGH 2025

Friday, October 31, 2025 1000–1730 GMT Room: Sidlaw, L3

ABOUT THE MEETING

Watch world-renowned experts present the latest advances in the management of the three most prevalent GU cancers: bladder, kidney, and prostate. Interact with the faculty and participate in dynamic discussions on the evolving management of GU cancers.

The B2B Meeting will be livestreamed on the *SIU@U* app, included with your Congress registration.

LEARNING OBJECTIVES

At the end of this programme, participants will be able to:

- Evaluate the benefits, risks, and limitations of various treatment options across the management continuum in prostate cancer, bladder cancer, and kidney cancer.
- Recognize the role of imaging and genetic markers in guiding treatment decision-making.
- Analyze the efficacy and safety of emerging therapeutic approaches for the management of GU cancers based on current clinical data.
- Recall strategies to identify, manage, and mitigate adverse events related to systemic treatment.
- Discuss the importance of personalized medicine, based on treatment costs and patient preference, while minimizing toxicity and maximizing efficacy.

Make Sure To Attend

ICUD Publications

Consultations are an important collaborative initiative between the SIU and the International Consultation on Urological Diseases (ICUD). These joint Consultations involve numerous international experts grouped into working committees that focus on specific aspects of the Consultation topic. Their conclusions are presented during the SIU Congress and later published in a comprehensive volume that becomes a valuable international reference on the topic.

BEST OF 2024: TOP 5 SESSIONS

Revisit the best of 2024 and watch these high-yield favourites on SIU Academy

- 1 eGrand Rounds—Update in BPH Management (May 15, 2024)**
This educational programme was supported by SIU Corporate Sponsor Karl Storz.

- 2 Urotrainer—Masterclass: Minimally Invasive Partial Nephrectomy**

- 3 SIU 2024 Webcast—Luncheon Symposium: Innovations in BPH Treatment: From Clinical Data to Patient Care**
This educational programme was supported by SIU Corporate Sponsor Olympus.

- 4 eGrand Rounds—Update in Stone Management**
This educational programme was supported by SIU Corporate Sponsor Karl Storz.

- 5 eGrand Rounds: Update in BPH Management (December 6, 2023)**
This educational programme was supported by SIU Corporate Sponsor Karl Storz.

SIU-ICUD Individualized Management of Male LUTS

The SIU will host committee chairs from the SIU-ICUD Consultation on Individualized Management of Male LUTS to present their recommendations on Saturday, November 1, 11:15-12:45, during the SIU's 45th Congress in Edinburgh—watch this session live in Fintry, L3, at the EICC or online on *SIU@U*. Led by Co-Editors, **Stavros Gravas**, **Dean Elterman**,

and **Andrea Tubaro**, this Consultation will provide a comprehensive, evidence-based, and practical approach to managing individual patients with LUTS in daily clinical practice.

Accessible to SIU members and Academy subscribers, this important document will be available online at the end of 2025.

Chapters and Chairs

Lower Urinary Tract Symptoms in Men

Karel Everaert, Belgium
Philip van Kerrebroeck, Netherlands

Patient Assessment

Marcus Drake, United Kingdom

Lifestyle Intervention and Pharmacological Treatments

Andrea Tubaro, Italy

Invasive Surgical Treatments

Peter Gilling, New Zealand
Henry Woo, Australia

Minimally Invasive Treatments

Bradley Gill, United States
Kevin Zorn, Canada

Predictive Models for Patient Outcome and Success Criteria

Stavros Gravas, Cyprus

Managing Patients with Complications and Persistent Symptoms

Enrico Finazzi Agrò, Italy

Host your event on an international stage!

Submit your event to be considered for SIU endorsement.

Open Access Journal

The *Société Internationale d'Urologie Journal* (SIUJ) is an international, peer-reviewed, open access journal that covers all aspects of urology and related fields. The Journal is owned by the SIU and is published bimonthly online by MDPI (since Volume 5, Issue 1, 2024).

Open Access

Free for readers and authors (diamond open access).

Rapid Publication

In 2024, most authors received a first decision and peer reviewer feedback less than 60 days after submission, and time from acceptance to publication was 21.1 days.

Recognition of Reviewers

Reviewer names are published annually in the Journal, reviewers can choose to add their names to reviews, and they are eligible for a variety of benefits through the publisher.

SIUJ: On the Horizon–Indexing

Through the rigorous work of its editorial board and the high-quality submissions of many authors from around the globe, the *SIUJ* continues to carve a space in the world of urology journals. The Journal is already indexed in the Directory of Open Access Journals (DOAJ) and EBSCO, and is listed as adhering to the Recommendations of the International Committee of Medical Journal Editors with respect to ethical standards in scholarly publishing. Now, a dedicated team is ensuring that *SIUJ* meets the rigorous requirements for indexing in PubMed Central.

Accessing the Journal

Subscribe via mdpi.com/journal/siuj to receive the eTOC for each issue and stay up to date on the latest content highlights via the *SIUJ* social media channels (X @SIU_Journal & LinkedIn).

Do you want to share your work with colleagues around the world? Go to the *SIUJ* page on MDPI at the link above to submit your research for peer review.

Journal Awards

Best Paper Award

The annual *SIUJ* Best Paper Award acknowledges high quality, scientifically important work whose publication has a significant impact. This year, the evaluation committee will choose article(s) published in the Journal from July 1, 2024, to June 30, 2025, and announce the winner(s) at the SIU Congress in Edinburgh. Winners will be awarded 500 CHF in recognition of their valuable contributions.

Outstanding Reviewer Award

The *Outstanding Reviewer Award* is given annually at the SIU Congress to recognize reviewers who generously contribute their time to reviewing papers and display thoroughness, professionalism, and timeliness. Winners will be chosen from all the previous year's reviewers and will be awarded 500 CHF in recognition of their valuable contributions.

ADVANCING NMIBC MANAGEMENT

From Clinical Evidence to Daily Practice

Scholarships

SIU Training Scholarships

The SIU offers two types of training scholarships. Urologists from the developing world who have earned their MD degree in the last 10 years are eligible to apply.

First scholarship

Allows the scholar to train in an SIU-Accredited Training Centre in the candidate's geographical area

Second scholarship

Grants the visiting scholar an observational role in an SIU-Accredited Training Centre

Both programmes offer scholarships for surgeons for a 3- or 6-month period in an FSIU-recognized institute, with **US \$5,000** for a 6-month period and **US \$2,500** for a 3-month period.

SIU-PAUSA Scholarship

The SIU and the Pan-African Urological Surgeons' Association (PAUSA) have partnered to offer a training scholarship for young urologists (within 10 years of obtaining their MD license) from Africa.

This scholarship will provide young urologists with an opportunity to enhance their skills by completing training in a non-African country. Each year, SIU and PAUSA grant one **6-month scholarship of US \$5,000 to one applicant**.

The portal for scholarship applications for 2026 will open in November 2025.

Visit the SIU website or email us at central.office@siu-urology.org for full details and requirements: siu-urology.org/society/training-scholarships

SIU Scholar Snapshots

Bushra Jawaaid

Pakistan, 2023 Scholarship recipient for Hamburg University Medical Center (UKE) in Germany

"[The SIU Scholarship] is a once-in-a-lifetime opportunity, and I am very lucky that I got it. The entire experience has been great and often feels like a dream. It has added a whole new dimension to my understanding of reconstructive urology, and I am excited to dive deeper and excel in it."

"I have found my calling in reconstructive urology and will look for more opportunities to learn further and polish my knowledge and skills in it. I am excited to apply the new techniques that I have learned from the training to my practice. There is still a long way to go but my start on this journey could not have been any better."

"I am forever humbled to SIU for giving me this opportunity. It is a great initiative and should continue. It's been an inspiring journey for me. Not only a learning experience but I also got to explore Germany and witness its beauty. I highly recommend it to young urologists like me for increasing exposure and boosting your career."

Mansour Ndoeye Diao

Senegal, 2023 Scholarship recipient for Bambino Gesù Pediatric Hospital in Italy

"I learned a different way to work in a team. For example, I appreciated the consultations with other specialists (neurosurgeon, pediatric surgeon) for harmonized decisions about a patient's follow-up."

"This was a big opportunity for me to discover and perform surgical practice that I never saw in my daily activity. That was a new experience that enriched my capacity to manage a pediatric patient. And this experience allowed me to learn other procedures that I can use for improving the follow-up of my patients."
