

Daniela Andrich
MS MSc FRCS

Daniela Andrich is a Consultant Reconstructive Urological Surgeon with a special interest in all aspects and aetiologies of urethral reconstruction; the surgical management of urinary incontinence (male and female); and the repair of urinary fistulae (urorectal and vesico-vaginal), which affects patients after various prostate cancer treatments, and in both sexes after radiotherapy.

Since 2007, Daniela has been the organiser of the annual Masterclass of Genitourethral Reconstructive Surgery at the Institute of Urology, UCLH, and is a regular participant in other international live-surgery workshops as well as a speaker at international urological meetings. Daniela is the current President of the Society of Genitourinary Reconstructive Surgery (GURS) 2015/6.
