OAR PROSTATE MRI WORKSHOP

Course Director:

Dr. Sangeet Ghai

Keynote Speakers:

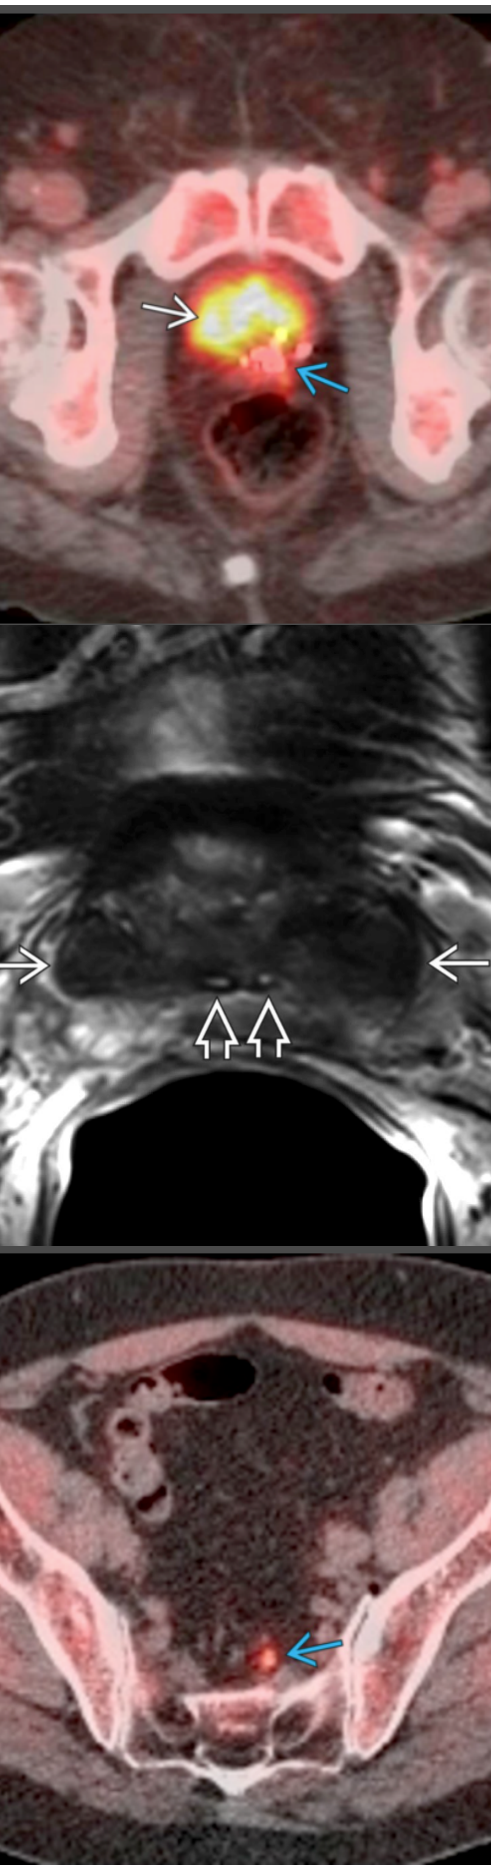

Dr. Tristan Barrett, Dr. Jurgen Fütterer & Dr. Silvia Chang

LEARNING OBJECTIVES:

This CME teaching activity is designed to provide practical information for radiologists who want to start or enhance their prostate MRI skills. It will include didactic lectures presented by experienced radiologists in the field and review many interesting Prostate MRI cases.

The participants will acquire basic knowledge and practical skills to interpret multi-parametric MR image cases and learn to use the PIRADS v2.1 for assessment and standardized reporting. Patient preparation, scan protocols, scan quality, bi-parametric and multi-parametric MRI will be discussed.

An overview of the Prostate Imaging Reporting & Data System (PI-RADS) v2.1 lexicon and how this system is used to improve diagnosis will be presented. During the Hands-on interactive workshop session, the participants will be able to review over 35+ cases with the experts.
