

Friday, October 16
1310-1440

Moderated ePosters 1
Basic Science

MP-01.01

Change of Angiogenic Factors in the Bladder Outlet Obstruction Induced Bladder Dysfunction
Yun Seob Song, South Korea

MP-01.02

Aquaporin 3 Expression Increases with Gestational Age in the Fetal Porcine Bladder
Lotte Kaasgaard Jakobsen, Denmark

MP-01.03

Improved Contractility of the Long Term Bladder Outlet Obstruction Induced Bladder Underactivity Using Growth Factor Expressing Mesenchymal Stem Cells
Yun Seob Song, South Korea

MP-01.04

Transient Receptor Potential Ankyrin 1 (TRPA1) Channels Mediate Cold Stress Induced Detrusor Overactivity in Rats
Tetsuya Imamura, Japan

MP-01.05

Establishment of Resident Human Endothelial Progenitor Cells from Fetal Cerebral Periventricular Vasculature
Yun Seob Song, South Korea

MP-01.06

Effect of Heat Shock Protein 70 Inhibition on the Growth and Oncogenic Signaling in Muscle Invasive Bladder Cancer Cells
Heinric Williams, USA

MP-01.07

Chemokine (C-X-C motif) Ligand 12 is Associated with Bladder Urothelial Cell Carcinoma Progression and Is a Novel Independent Poor Prognostic Factor
Xiaofeng Zou, China

MP-01.08

Identification of FGFR4 as a Potential Therapeutic Target for Clear Cell Renal Cell Carcinoma
Xiaofeng Zou, China

MP-01.09

The Effect of Zinc Chloride and Cobalt Chloride on Hypoxia-Inducible Factors in Immortalized Human Kidney Cells
Luke Gibson, Australia

MP-01.10

Application of Cellular Technologies for Restoration of Production of Testosterone at Men of the Senior Age Groups

Alexander Pechersky, Russia

MP-01.11

Comparison of Depressive-like Symptoms and Sexual Behavior in Rat Model Treated with Anti-androgen (Bicalutamide vs. Goserelin) and Surgical Castration

Chang Hoo Park, South Korea

MP-01.12

The Therapeutic Efficacy of Human Umbilical Cord Blood-Derived Mesenchymal Stem Cells (UCB-MSCs) on Ketamine Induced Cystitis

Ju Hyun Lim, South Korea
