

# What is GPC ?

- **Global Philanthropic Committee**
- The Global Philanthropic Committee (GPC) supports proposals for worthy projects to improve urologic care throughout the developing world. The Committee is a partnership between the AUA, EAU (European Urology Association), ICS (International Continence Society) and the SIU (Société Internationale d'Urologie). The Committee enables organizations to pool their resources to fund larger scale philanthropic projects as a collaborative effort.

# History of University Hospital St Francois de Sales

( Some Source from Haiti ,Libre, Newspaper )

The newly built University Hospital Saint Francois de Sales was inaugurated on the 5<sup>th</sup> Anniversary ( January 12, 2015 ) of the devastating Earthquake ( January 12, 2010 ) that destroyed most of the infrastructure of the Capital of Haiti including Hospitals, Churches, Schools and Universities.

The University Hospital leaders , explained that the reconstruction works of the hospital, destroyed more than 80% during the January 2010 earthquake, lasted 3 years and have cost approximately US \$22.7 million, funded by the Archbishop of Port-au-Prince, the international organization CRS (Catholic Relief Services), the Catholic Health Association CHA and "Fundacion Sur Futuro" of the Dominican Republic.

# History of University Hospital St Francois de Sales

( Some Source from Haiti ,Libre, Newspaper )

- The services offered in this first phase of the hospital are: internal medicine, emergency room, surgery, obstetrics and gynecology, pediatrics, orthopedics, medical imaging, laboratory, outpatient clinic, the ambulance service, pharmacy, pastoral care and community health.
- Urology was not included in the initial plan until the Hospital was approached by the Association Haitienne D'Urologie and the Global Association for the Support of Haitian Urology- leading to the signature of the memorandum of Understanding and the donation of the GPC initiated / Karl – Storz endoscopic instrument's donations August, 26, 2016

The capacity of this University Hospital are: 190 beds, 6,000 outpatient consultations per month, 2,000 surgeries a year and 3,500 hospitalizations. The new structure has a forty single rooms with single beds and twenty rooms shared between 2 and 8 beds.

The current staff consists of 25 doctors, 70 nurses, 90 assistants, 18 laboratory technicians 4 laboratory technicians and one chaplain. This number will increase to 291 at the end of 2015 to reach 372 employees during the second year of operation.

In the future, another phase includes the addition of a dialysis unit, surgery, urology and a training and research center. Note this first phase of work was carried out by the Dominican firm OTESA.

The hospital will serve all Haitians in need of care and services with no cleavage, no discrimination or exclusion," said Ms. Florence Duperval Guillaume, the minister of Health at the time.

In his homily, Bishop Guire Poulard, President of the hospital board at the time ,declared "It's a new day that begins with the opening of this hospital, we hope that this hospital will contribute in the construction of a new Haiti. That the hospital could serve all citizens of the country regardless of their socio-economic conditions and social status
