

## SIU-IVUmed Collaboration: Summary of Activities, September 2016

SIU and IVUmed work to build access to quality urological training and care throughout the world. Our combination of hands-on training, professional meetings, and online education help build skills among urologists and increase access to care in low-resource settings. We conduct surgical workshops focusing on various urological sub-specialties and send visiting professors to provide follow-up training. To date in 2016, we have accomplished the following:

### **Deschappelles, Haiti**—January 16-23, 2016

General and reconstructive urology training  
Led by Rob Edelstein, MD  
Trained 6 doctors and nurses and served 125 patients

### **Wad Medani, Sudan**—January 17-23, 2016

Reconstructive urology training  
Led by Sandesh Surana, MD  
Trained 34 doctors and nurses and served 20 patients

### **Ajmer, India**—February 13-20
